OBJECTIVE

Motivated and detail-oriented B.Tech student in Electronics and Communication with practical experience in Deep Learning using Python and Core Java. Possesses strong problem-solving abilities and a collaborative mindset. Currently authoring two research papers in deep learning, with a keen interest in applying AI solutions to real-world challenges.

EDUCATION

2021-2025| GURU NANAK DEV UNIVERSITY, AMRITSAR
B. TECH in Electronics and Communication
CGPA: 8.8
2020-2021| SSSS KHALSA SEN. SEC. SCHOOL, AMRITSAR
12TH CLASS (PBSE): 93%
2018-2019| BABA JAGO SHAHEED ADARSH SCHOOL, AMRITSAR
10TH CLASS (PBSE): 95%

PROFESSIONAL EXPERIENCE

Research Intern| Guru Nanak Dev University, Amritsar, Punjab, India (Jan 2025 – June 2025)

- Skilled in Deep Learning with Python; experienced in end-to-end model development
- Delivered and deployed two real-world DL projects with measurable impact
- Strong collaborator with proven problem-solving and implementation abilities
- Author of two DL research papers currently under publication.

PROJECTS

- **TeamViewer | Java, MySQL**

Developed a basic remote desktop application with user login, desktop control, and cross-device access. Implemented secure protocols to support collaboration between users over a network. https://github.com/Sehajpreet-kaur/TeamViewer-Clone-Java.git

- **Alcohol Detector| IoT, Sensors, Embedded Systems**

Built a breath-based alcohol detection system that locks vehicle ignition and sends automatic alerts to registered contacts. Integrated GSM module for messaging functionality and real-time response.

- **Brain Tumour Detection| Python, CNN, Deep Learning**

Developed a CNN-based model for classifying brain tumors from MRI images. Performed image preprocessing, augmentation, training, and model evaluation. Achieved 99.9% accuracy.

📌 Research paper under review for publication. https://github.com/Sehajpreet-kaur/brain-tumor-flower-classification.git

CERTIFICATIONS

- Core Java Programming
- Python Programming.
- Deep Learning Fundamentals
- SQL for Data Analysis
- Data Structures and Algorithms.

ACHIEVEMENTS

- Authored two DL research papers (under publication review, 2025)
- Selected PR Team Member for Student Forum; organized 3+ departmental events and tech talks.

- **Flower Classification| Python, CNN, Deep Learning**

Implemented a deep learning model to identify flower species from image data using CNNs. Focused on multi-class classification with performance enhancement through data augmentation. Achieved 96.4% accuracy. 📌 Research paper under review for publication. https://github.com/Sehajpreet-kaur/brain-tumor-flower-classification.git

TECHNICAL SKILLS

Languages: Python (Basic), Java
ML/AI: CNN, Transfer Learning, Model Evaluation, Deep Learning Fundamentals
Tools & Frameworks: MySQL, Git, GitHub
Core CS: Data Structures & Algorithms, SQL, RDBMS, OOPs
Soft Skills: Teamwork, Communication, Problem-Solving
Practice: Solved 30+ LeetCode problems

Portfolio
brain-tumor-flower-classification
TeamViewer Clone
